New Equipment Designation

1. The following designation was assigned 31 March.

RR-33 . . . 3 to 30 MC Transistorized Receiver. The RR-33 is a crystal controlled, amplitude modulated, transistorized receiver. It is packaged in a small metal case that contains the circuitry of a Zenith Royal 500 transistorized receiver. Also included is circuitry similar to a CV-2 transistorized RF converter.

2. This designation was made on a tentative basis pending approval of this memorandum.

50X1

Approved:**Chief, Research and Development Branch****Distribution:**
